4) Combo –Edit Your Combo Records

- Fill out all the appropriate fields.
- Enter a Start and End Date/Time.
- Enter up to 5 PLUs to include in your combo.
- Enter the new prices.
- SAVE

Instructions for Making a Combo Record

1. A Combo File can ONLY be sold through a 'Soft Key' programmed on the Verifone Register. You cannot scan the items if you are selling them as a Combo.

Example: 1) A convenience store owner wants to sell a sandwich combo consisting of a sandwich, medium fries, and a medium soft drink for \$4.10 plus 7% sales tax. The discounted price of the individual items excluding tax appears below.

Discounted Item	Original Price	Discounted Price
Sandwich	\$2.50	\$1.80
Medium French Fires	\$1.70	\$1.40
Medium Soft Drink	\$1.10	\$0.90
TOTAL:	\$5.30	\$4.10

General Rules

- Do not mix taxable and non-taxable PLU's in the same Combo.
- Do not mix PLU's set up for food stamps and ones which are not.
- Do not mix PLU's which have blue laws with those that do not.
- Do not mix PLU's where 'Refund Allowed' is a Yes, with those that are a No.
- If any of the PLU's in the Combo require an ID check, then set the Combo 'ID required' to a Yes.
- Car Wash PLU's can be used as part of a Combo. The car wash function must be installed and enabled.
- If any PLU that is used in a Combo currently has the promotion programmed on this PLU, the Combo price will override the individual promotion price of that PLU.
- A PLU with a FeeCharge can be assigned to a Combo. However, the Ruby Software only applies the 'Fee Type' assigned in the Combo file.

4) Mix – Add or Edit Your Mix Records

- a. In each mix there are 5 different sections. In each section you can add 10 different PLUs.

	MixNu	Plu Series Num
1	1	Plu 1 - 10
2	1	Plu 11 - 20
3	1	Plu 21 - 30
4	1	Plu 31 - 40
5	1	Plu 41 - 50

- b. To create a mix, select the first set (Plu 1-10), Put it into record mode, Then Edit Mode.

Mix Record

MixNumber: 1

Plu Series Number: Plu 1 - 10

Description: Deli Sandwiches

Mix Linker: []

	PLU #	Modifier	Description	Size	Current Price
Item 1	45678912345	0	HAM AND CHEESE		2.25
Item 2	56789123456	0	EGG SALAD		2.19
Item 3	67891234567	0	TURKEY SALAD		2.35
Item 4	78912345678	0	HAM/TURKEY/CHEESE		1.99
Item 5	89123456789	0	CHICKEN SANDWICH		2.45
Item 6	91234567891	0	CHICKEN AND BACON		2.42
Item 7	*	0			.00
Item 8	*	0			.00
Item 9	*	0			.00
Item 10	*	0			.00

- c. In this section, you can type or scan up to ten PLUs to include in this deal.
- d. If you want to include more than 10 PLUs in your deal, you would go back to the browse mode and go into the 2nd section (11-20) in mix number 1 and so on.
- e. If you have more than one section, you then use the Mix Linker and all of the sections will be linked to one mix.
- f. To make the mix part of a deal, you have to go into the Match part of 'deal'.

- 4) Match – Add or Edit Your Match Records
- d. Select a Match Record from the browse view.
 - e. Put it into Record Mode, Then into Edit Mode.

Record: Match

You CANNOT add or delete Match Records

Match Number:

Match Description:

Price Scheme:

Start: The Year CANNOT be greater than 2049

Time:

Mix Number	Description	Quantity	Price Each	Type	Pricing
Item 1 <input type="button" value="v"/>	<input type="text" value="Deli Sandwiches"/>	<input type="text" value="0"/>	<input type="text" value="1.90"/>	<input type="text" value="Plu Mix"/> <input type="button" value="v"/>	<input type="text" value="Define Price"/> <input type="button" value="v"/>
Item 2 <input type="button" value="v"/>	<input type="text"/>	<input type="text" value="0"/>	<input type="text" value=".00"/>	<input type="text" value="Plu Mix"/> <input type="button" value="v"/>	<input type="text" value="Define Price"/> <input type="button" value="v"/>

Item 5 <input type="button" value="v"/>	<input type="text"/>	<input type="text" value="0"/>	<input type="text" value=".00"/>	<input type="text" value="Plu Mix"/> <input type="button" value="v"/>	<input type="text" value="Define Price"/> <input type="button" value="v"/>
Total			<input type="text" value=".00"/>		

- f. Enter a Description.
- g. Enter a Start and End Date/Time.
- h. Under 'Mix Number', you can select the mix that you entered before. If you had more than 10 it will enter all the PLUs.
- i. If the deal is 2 for \$2.22, then under 'Quantity' you would enter 2, since the deal is for any 2 bottles.
- j. In 'Price Each' you would enter the price that is to be charged for each bottle (\$1.11).
- k. SAVE

Instructions for Making a Mix and Match File

Setting up a Mix File:

- A. Do not assign a PLU to the same Mix file more than once.
- B. The same PLU can be included in more than one Mix but those Mixes cannot be assigned to the same Match.
- C. PLU's with Fee/Charges assigned to them do not receive discounts on the fees/charges.
- D. Use only PLU's that are not used in a promotion.
- E. Use only PLU's which are attached to a positive Department. Where the 'Negative Department?' field is set to 'No'.
- F. A Mix file can contain up to 10 different PLU items. But the same PLU item cannot be used more than once in the same mix file.

How Mix and Match Files are used:

Example1: Buy three items and get a discount. (Note: This is very similar to a Combo. But this now gives you the ability to have multiple selections for each item whereas the Combo must be only the single item in each category without any selections.

A manager wants to sell a combination of any Deli-Fresh Sandwiches 3.5 oz, bag of chips, and any 20 oz bottle of soda. If the customer would purchase any one of the items from each of the Mix tables then they would receive the discounted price. (Note: Using Match files your cashier can now scan the items. They do not have to press a soft key.

To do this we would need to set up three (3) separate mix files. One for the sandwiches, one for the bags of chips and the last one for the sodas.

Description	Original Price	Match Discount Price
-------------	----------------	----------------------

Mix #1 Deli Fresh Sandwiches

Deli-Fresh Ham & Cheese	\$2.25	Any of the sandwiches are \$1.90 when included in the Match.
Deli-Fresh Egg Salad	\$2.19	
Deli-Fresh Turkey Salad	\$2.35	
Deli-Fresh Ham\Turkey\Cheese	\$1.99	
Deli-Fresh Chicken Sandwich	\$2.45	
Deli-Fresh Chicken and Bacon	\$2.42	

Mix #2 Chips 3.5 oz

Classic Potato	\$0.99	Any of the chips are \$0.85 when included in the Match.
Ripple	\$0.99	
Sour Cream & Onion	\$1.09	
Western Barbeque	\$0.99	
Cheddar Cheese	\$1.09	

Mix #3 20 oz Soda Bottles

Soda	\$1.29	Any of the soda's are \$1.09 when included in the Match.
Diet Soda	\$1.29	
Soda C/F	\$1.29	
Diet Soda C/F	\$1.29	
Yellow Soda	\$1.29	
Diet Yellow Soda	\$1.29	
Red	\$1.29	
Diet Red	\$1.29	
Wild Cherry Soda	\$1.29	
Diet Wild Cherry Soda	\$1.29	

Creating the Match File for Example #1. Create a single Match File using the three Mix tables above. In this example, when the Match file asks for a quantity, you would enter a '1'. This means that you only need to purchase '1' item from each of the three different Mix tables to receive the discount.

After one of each item is scanned at the Verifone Register, the Verifone Register will display the total discounted price for the Match.

Example #2. - Buy five packs of cigs and get a discount

A manager wants to offer a discount for purchasing at least five packs of cigarettes. The only limitation to this example is that you are limited to offering this discount on only 7 different brands of cigarettes at a time. So in our example we will offer the discount on 4 different Cigarette packs and 3 different Cigar packs. This will give us our 7 different PLU's that can all fit into a single Mix table.

You would do this by first creating a Mix file or a Mix table and label it 'Mixed Packs of Cigarettes'. You would then enter in the 4 types of Cigarettes, 3 types of cigars. See below.

MIX #4 = Mixed packs of cigarettes.

Cig Box	\$4.59	When you purchase at least 5 packs from the Mix File Each Pack would be \$4.19
Cig Soft Pack	\$4.59	
Cig Light Box	\$4.79	
Cig Light 100's	\$4.29	
Cigar Box	\$4.49	
Cigar 100's	\$4.29	
Cigar Lights Soft	\$4.79	

Creating the Match File for Example #2. You would create a new Match file and select this Mix table with the 7 different brands of cigarette packs.

Enter a '5' in the quantity field. This means that a customer would have to at least purchase 5 packs from the list in the Mix table. Then in the Price field you would enter a price of \$4.19. This tells the Verifone Register that once 5 of these items are purchased from this Mix table that all the items will be sold at a price of \$4.19. The discount will show up on the customers receipt.
